4005 Rural Broadband Experiment

Authorized Rural Broadband Experiment (RBE) recipients must address the certification for public interest obligations, provide a list of newly served community anchor institutions, and provide a list of locations where broadband has been deployed.

Public Interest Obligations – FCC 14-98 (paragraphs 26-29, 78)

Please address Line 4001 regarding compliance with the Commission’s public interest obligations. All RBE participants must provide a response to Line 4001.

4001. Recipient certifies that it is offering broadband to the identified locations meeting the requisite public interest obligations consistent with the category for which they were selected, including broadband speed, latency, usage capacity, and rates that are reasonably comparable to rates for comparable offerings in urban areas?

Community Anchor Institutions – FCC 14-98 (paragraph 79)

4003a. RBE participants must provide the number, names, and addresses of community anchor institutions to which they newly deployed broadband service in the preceding calendar year. On this line, please respond (yes – attach new community anchors, no – no new anchors) to indicate whether this list will be provided.

If yes to 4003A, please provide a response for 4003B.

4003b. Provide the number, names and addresses of community anchor institutions to which the recipient newly began providing access to broadband service in the preceding calendar year.

Name of Attached Document Listing Required Information

Broadband Deployment Locations – FCC 14-98 (paragraph 80)

4004a. Attach a list of geocoded locations to which broadband has been deployed as of the June 1st immediately preceding the July 1st filing deadline for the FCC Form 481.

Name of Attached Document Listing Required Information

4004b. Attach evidence demonstrating that the recipient is meeting the relevant public service obligations for the identified locations. Materials must at least detail the pricing, offered broadband speed and data usage allowances available in the relevant geographic area.

Name of Attached Document Listing Required Information

Line 510 – Description of Compliance with Service Quality and Consumer Protection

AT&T has established methods and procedures that are designed to facilitate compliance with applicable service quality standards and consumer protection rules. In the event that a service quality or consumer protection issue arises, AT&T works with appropriate government entities and/or customers to resolve the issue consistent with AT&T's obligations.

AT&T has implemented Customer Proprietary Network Information and Truth-in-Billing procedures in accordance with the Commission's requirements. AT&T also makes available the rates, terms and conditions of its service offerings through service guides, guidebooks and, where applicable, tariffs, which consumers can access through AT&T's website (*available at <http://www.att.com/gen/public-affairs?pid=11970>*). Among other things, these documents clearly explain the terms of service, including dispute resolution procedures and billing and payment requirements. Consumers are able to contact AT&T with questions or concerns through a toll-free number or online. Also, AT&T advertises its services using media of general distribution and these advertisements are clear and contain appropriate disclosures. Lastly, AT&T has a company-wide privacy policy that describes how AT&T collects, uses and protects its customer's information (*available at http://about.att.com/sites/privacy_policy*).

Line 610 – Descriptive Document for Functionality in Emergency Situations

Section 54.313(a) (6) of the Commission's rules requires an Eligible Telecommunication Carrier (ETC) to certify an ability to function in emergency situations as set forth in Section 54.202(a)(2) of the Commission's rules. The standards set forth in Section 54.202(a)(2) include having a reasonable amount of back-up power to ensure functionality without an external power source, having an ability to reroute traffic around damaged facilities, and having a capability to manage traffic spikes resulting from emergency situations.

All AT&T ILEC central offices are equipped with battery backup equipment. Offices with dedicated standby generators are equipped with sufficient battery capacity to run for approximately four hours without power; offices with access to portable generators have sufficient battery capacity to operate for approximately eight hours without power. The fuel tanks supporting the standby generators are typically sized to supply enough fuel, at three-quarters full fuel capacity, for approximately one to three (or more) days runtime (the continuous operation of the engine alternator set at 100% [full] load).

Each major element of the AT&T network (IP, TDM voice, cellular, etc.) is under the oversight of a Technology Reliability Center (TRC) that manages and controls the network's operation. Technology Reliability Centers are located throughout the United States and are responsible for:

- Proactive 7x24 surveillance of network elements (fault management)
- Progress and event notification to Customer Care Centers
- Asset management (including spare equipment availability)
- Logical configuration management
- Network upgrades and change management
- Direction of the maintenance activities of business partners (including the network field operations force and capacity management).

The AT&T Global Technology Operations Center (GTOC) provides the command and control functions for the TRC organization and serves as the central point of contact for all network and application related traffic and incident management across all of AT&T. The GTOC proactively manages the data and voice traffic flowing across AT&T's domestic and global networks twenty-four hours a day, seven days a week. This proactive network management ensures maximum traffic flow by preventing, minimizing, and/or controlling disruptions to network elements and applications, and impacts to customers. It also performs storm impact reporting to ensure service impacts due to storms are mitigated as rapidly as possible and is prepared to respond to security intrusion related events and finally administers Change Restrictions to reduce risk of change caused disruptions proactively for special events and reactively for emergency conditions.

The GTOC's 3P (Preventive, Predictive, Pro-Active) process collects, identifies, and evaluates the consolidated network view of any high-risk network vulnerabilities to determine if there is a need to develop a mitigation response plan for the network.

- This process is used for National Special Security Events (NSSEs), political conventions, the Olympics, high profile sporting events, and hurricane/storm preparations.
- The mitigation plan is developed to minimize network service affecting incidents with the activation of a managed restoration plan.

- In addition to ensuring a response plan for any adverse events, the team also reviews and addresses issues such as capacity, infrastructure, and physical reliability.

AT&T emergency response teams have extensive experience in planning for and responding to a wide variety of situations, including hurricanes, floods, power outages, earthquakes and man-made disasters. We have a variety of specialist “First Strike” teams with responders that work to restore the AT&T network as quickly and safely as possible. Our Network Disaster Recovery (NDR) program allows a rapid and predictable response to the loss of an entire network office. The program includes specially trained managers, engineers and technicians from across the company, as well as a fleet of more than 320 technology recovery trailers and support vehicles that house the same equipment and components as our data-routing or voice-switching centers. The NDR process and capability has been tested in field exercises several times a year since 1992.

The AT&T Technology Operations Business Continuity Team manages business continuity risks across AT&T’s Network and IT technologies and organizations. The scope includes the development and maintenance of business continuity plans and emergency procedures consistent with industry best practices. Our plans are designed to get processes, applications and personnel back to a Business-As-Usual (BAU) state as quickly and safely as possible. The planning process includes incorporating improvement opportunities from previous events into future response activities.

AT&T’s Technology Operations Emergency Management Center manages processes, procedures, resources, and teams in response to disasters. This includes up-front prevention and mitigation efforts, as well as executing comprehensive emergency response and recovery plans in the event of a disaster or crisis:

- Business Continuity – development, maintenance, and emergency procedures consistent with industry best practices.
- Disaster Recovery – planning, testing and actual recovery of critical network infrastructure and critical IT infrastructure and applications.

In 2015, AT&T became the first telecom sector company to become certified under the new international Business Continuity Management standard (ISO 22301) for the Voluntary Private Sector Preparedness Program (PS-Prep™). AT&T received its original certification for PS-Prep in 2012. The new ISO standard is the logical successor to the previous standard and became the accepted Business Continuity Management standard worldwide. PS-Prep™ is a partnership between the Department of Homeland Security and the private sector enabling private businesses to demonstrate their capabilities for planning for, responding to, and recovering from disasters and other emergencies.

Based on the foregoing, the reporting carrier certifies it is able to function in emergency situations as set forth in Section 54.202(a)(2).

The Honorable Phylliss J. Anderson
Tribal Chief, Mississippi Band of Choctaw Indians
Post Office Box 6010
Choctaw, Mississippi 39350

Dear Chief Anderson:

AT&T Mississippi and AT&T Mobility LLC ("AT&T") have been designated as eligible telecommunications carriers ("ETCs") for the purpose of receiving federal high-cost universal service support ("USF") in certain geographic locations in Mississippi, including all or part of the lands of the Mississippi Band of Choctaw Indians. As ETCs, AT&T is subject to the rules and requirements of the Federal Communications Commission ("FCC"), including 47 C.F.R. § 54.313(a)(9), which requires high-cost USF recipients that serve Tribal lands to have discussions with Tribal governments.¹ This rule became effective August 5, 2013.²

You are receiving this letter because in 2016 AT&T received federal high-cost support in Mississippi. AT&T is available for discussions with you and your colleagues about AT&T's wireless service and the topics set forth in 47 C.F.R. § 54.313(a)(9), such as planning, sustainability, and land use issues.

Should you have any questions, please call me. I can be reached at (601) 592-6510.

Yours truly,

Bill Harris

¹ See *Connect America Fund*, WC Docket No. 10-90 et al., 26 FCC Rcd 17663 (2011) ("USF/ICC Transformation Order"); 47 C.F.R. § 54.313(a)(9). See also *Office of Native Affairs and Policy, Wireless Telecommunications Bureau, and Wireline Competition Bureau Issue Further Guidance on Tribal Government Engagement Obligation Provisions of the Connect America Fund*, Public Notice, DA 12-11665 (rel. July 19, 2012), available at http://fjallfoss.fcc.gov/edocs_public/attachmatch/DA-12-1165A1.pdf.

² See 78 Fed. Reg. 47211 (Aug. 5, 2013). This rule is the subject of numerous petitions for reconsideration, which, to date, the FCC has neglected to address. See *Petition for Reconsideration of USTelecom*, WC Docket No. 10-90 et al. (filed Dec. 29, 2011); *Rural Incumbent Local Exchange Carriers Serving Tribal Lands Petition for Reconsideration*, WC Docket No. 10-90 et al. (filed Dec. 29, 2011); *Petition for Reconsideration and Clarification of USTelecom*, WC Docket No. 10-90 et al., 4-16 (filed Aug. 20, 2012); *USTelecom's Petition for Reconsideration and Clarification and Comments in Response to Paperwork Reduction Act*, WC Docket No. 10-90 et al. (filed April 4, 2013).

285184MS1010

Voice Services Rate Comparability Compliance

AT&T's fixed voice service rates for each exchange included in this Form 481 filing, as displayed on Line 703c of the attached Line 700 form, are below the FCC's 2017 \$49.51 reasonable comparability benchmark for basic residential voice service. *See Wireline Competition Bureau Announces Results of 2017 Urban Rate Survey for Fixed Voice and Broadband Services*, WC Docket No. 10-90, DA 17-167 (rel. February 14, 2017).

Broadband Service Rate Comparability Compliance

AT&T has at least one broadband service offering, as displayed on the attached Line 1000 form, that is priced at or below the FCC's 2017 reasonable comparability benchmark for broadband service. See, for example, AT&T's 24.1 Mbps download speed, 3 Mbps upload speed, with 1000 GB monthly usage allowance that is priced at \$70, which is below the FCC's reasonable comparability benchmark of \$89.90 for that service. *See Wireline Competition Bureau Announces Results of 2017 Urban Rate Survey for Fixed Voice and Broadband Services*, WC Docket No. 10-90, DA 17-167 (rel. February 14, 2017).

Please complete the statement below:

The total amount of capital funding expended in the previous year in meeting Connect America Phase I deployment obligations is:

Year 3
